Examiner's Amendment

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

The application has been amended as follows to have abstract in a one paragraph:

In the abstract:

Please replace current abstract with attached abstract.

Reasons For Allowance

The following is an Examiner's Statement of Reasons for Allowance: The prior art of record does not teach the claimed plasma display panel comprising a first light shielding layer between a transparent electrode and a metal bus electrode and a second light shielding layer between adjacent discharge cells in combination with remaining features of the claim (please see independent claim).

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Contact Information

Any inquiry concerning this communication or earlier communications form the examiner should be directed to Vip Patel whose telephone number is (571) 272-2458. The examiner can normally be reached on Monday-Thursday from 6:30 AM- 5:00 PM. The fax phone number for this Group is (571) 273-8300.

Abstract

The present invention relates to a plasma display panel, that is capable of preventing the discoloration of a substrate caused by migration of a metal bus electrode or metal paste's running down.

The plasma display panel includes a transparent electrode; a metal bus electrode; a first light shielding layer formed between the transparent electrode and the metal bus electrode on each discharge cell; a second light shielding layer formed between the adjacent discharge cells. The first light shielding layer and the second light shielding layer are different from each other in at least one of a thickness and a pigment concentration.
